GEORGE JAMES PEIRCE

Frontispiece to Volume 10, MADROÑO

To Dr. George James Peirce, botanist, teacher, administrator, humanitarian, steadfast friend of the California Botanical Society, we dedicate this tenth volume of *Madroño*. Now in his eighty-third year and Professor of Botany Emeritus at Stanford University, Professor Peirce has been an enthusiastic and inspiring teacher with a career characterized by close, sympathetic and friendly relations with his students. In recent years, more and more of his time has been dedicated to public service in his home community. His is a life that commands the respect and has won the love of all who know him. We welcome this opportunity to express to him our appreciation, to wish him the joy of continued good health, and to congratulate him on the satisfactions that come from an eminently useful life.
